

# Angio Rehab - Arm Ergometer

Discover the revolutionary Angio Rehab - Arm Ergometer, an innovative solution that redefines the field of medical rehabilitation. Seamlessly integrating arm and leg ergometry for an enhanced rehabilitation experience.

## Versatile arm & supine ergometry

The Angio Rehab - Arm Ergometer offers both arm and supine rehabilitation. Designed for patients who cannot use traditional ergometers, it enables targeted testing and training across a wide range of clinical environments, including intensive care, cardiology, and rehabilitation. Its compact footprint makes it especially suitable where space and flexibility are critical.

## Flexible mounting options to suit your needs

We understand that every workspace has different requirements, which is why the Angio Rehab is available with multiple mounting options. Choose from the standard fixation set, Static Wall Fixation for a stable and space-saving solution, Electrically Adjustable Wall Fixation for flexible height adjustment, or an Automatic Stand for complete mobility and positioning freedom.

## Precision & performance for optimal rehabilitation

The Angio Rehab is a high-quality ergometer engineered for seamless integration with medical instrument rails.

- extreme low start-up load
- 1 Watt adjustment steps
- LEM compatible
- Additional features with PCU
- Accurate over a long period of time.

## Why the Angio Rehab Arm Ergometer

### Reliable and reproducible stress tests

The experience of professionals who calibrate many ergometers showed that the Lode ergometers are the most reliable across the complete workload and rpm range and still within specifications even after many years of intensive use.

### Multifunctional

The ergometer can be used in various ergometry settings, enabling a multifunctional deployment.

### Various test modes

Besides the hyperbolic (rpm-independent) mode that is used most of the time, the standard control unit offers several other test modes, like the fixed torque mode and the linear mode. These modes can be used in both manual and terminal mode.

### Easy to clean

The design of the ergometer and the housing material make it very easy to clean.

### High standards

Lode is a socially and environmentally responsible company. All Lode products are RoHS/WEEE compliant and Lode is ISO 9001:2015, and ISO 13485:2016 certified. All medical products comply to MDD 93/42/EEC, incl. IEC 60601-1.

### Flexible mounting options to suit your needs

The Angio Rehab - Arm Ergometer t is also available with Static Wall Fixation, Electrically Adjustable Wall Fixation, and an Automatic Stand for optimal flexibility and convenience.
