

Corival Recumbent rehab

Specifically designed for individuals with medical conditions that find standard bicycle ergometers uncomfortable during rehabilitation sessions.

Accessible and comfortable rehabilitation

The Corival Recumbent Rehab is designed for patients who require extra support during rehabilitation. Its low step-through frame and adjustable seat ensure easy access and a comfortable, stable workout experience for users of all mobility levels.

Smooth and adaptive performance

Equipped with advanced motor technology, the Corival Recumbent Rehab delivers quiet and precise resistance adjustments. This ensures a smooth pedaling motion, allowing for safe and controlled rehabilitation tailored to individual patient needs.

Seamless integration and reliable data

The Corival Recumbent Rehab integrates effortlessly with clinical monitoring systems, providing accurate real-time data on patient performance.

Safety and stability

Designed for safety, the Corival Recumbent Rehab features a stable, ergonomic design with adjustable handlebars, an emergency stop, and a CPR position for quick emergency access.

- Extreme low start up load
- Ultra-low step-through
- Seated biking
- Equipped with a 7" touch screen control unit

Why the Corival Recumbent Rehab

Reliable and reproducible stress tests

The experience of professionals who calibrate many ergometers showed that the Lode ergometers are the most reliable across the complete workload and rpm range and still within specifications even after many years of intensive use.

Adjustable back support with flat CPR position

The back support can be adjusted in order to guarantee the most comfort position for each individual test subject. In case of emergency, the back support can be adjusted to a flat CPR position in 1 action.

Maximum patient weight 300 kg

Patients of up to 300 kg body weight can be tested on this ergometer.

Electric adjustable seat positioning

The seat of the ergometer can be adjusted electrically.

Suitable for all body postures

This ergometer is designed to offer comfort ergometry testing for test subject of all body postures.
